

Front-end

Framework: Semantic/Fomantic UI

Jquery

Sass

Back-end

Framework: Express and Node

Database: Postgress

Deployment:

- 1) AWS
- 2) Heruko
- 3) HERUKO AND
NETLIFY

Doug:

- Landing
- Singin
- Singnup
- profile

Ali:

- Feed
- Browse
- design and resposisivness

Jay:

- Popular
- My resource
- Add resource
- search

Friday TODO:

1. Exercise
2. Choosing a project
3. Listing all features
4. Importance of features
5. Endpoints (gets/posts..)
6. Designing database ERD
7. Creating Repo
8. Timeframe
9. Splitting the work
10. Eslintrc (prettier)

Stories

- users should be able to save an external URL along with a title and description
- users should be able to search for already-saved resources created by any user
- users should be able to categorize any resource under a topic
- users should be able to comment on any resource
- users should be able to rate any resource
- users should be able to like any resource
- users should be able to view all their own and all liked resources on one page ("My resources")
- users should be able to register, log in, log out and update their profile

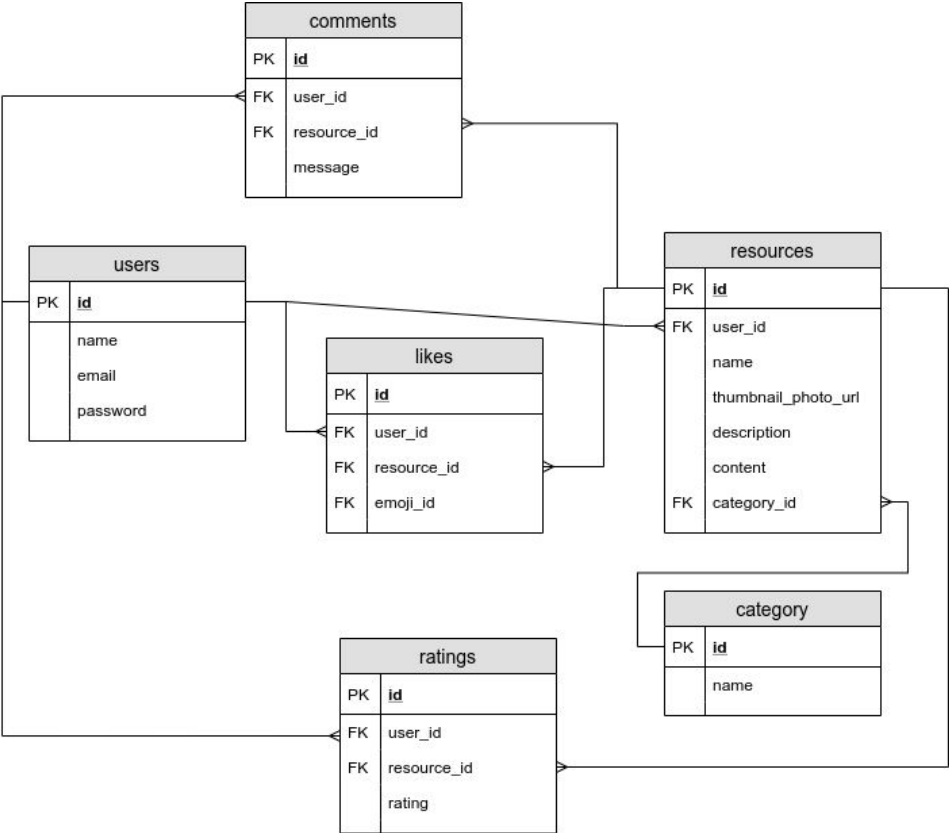

Pages

- Landing page
- Login/Register
- Home (collections - add resource - search(header) - my resources)
- Profile

Deep freeze:

- Side bar of categories
- Right side bar popular
- Tags
- Checkout other users profile
- Delete users

ERD

Endpoints (pages)

get("/") - Landing page (if logged in redirects to home page)

get("/login")

get("/register")

get("/home") - Home (collections - add resource - search(header) - my resources)

get("/profile") (if signed in - your profile) otherwise redirect back login

Endpoints (posts)

post("/register")

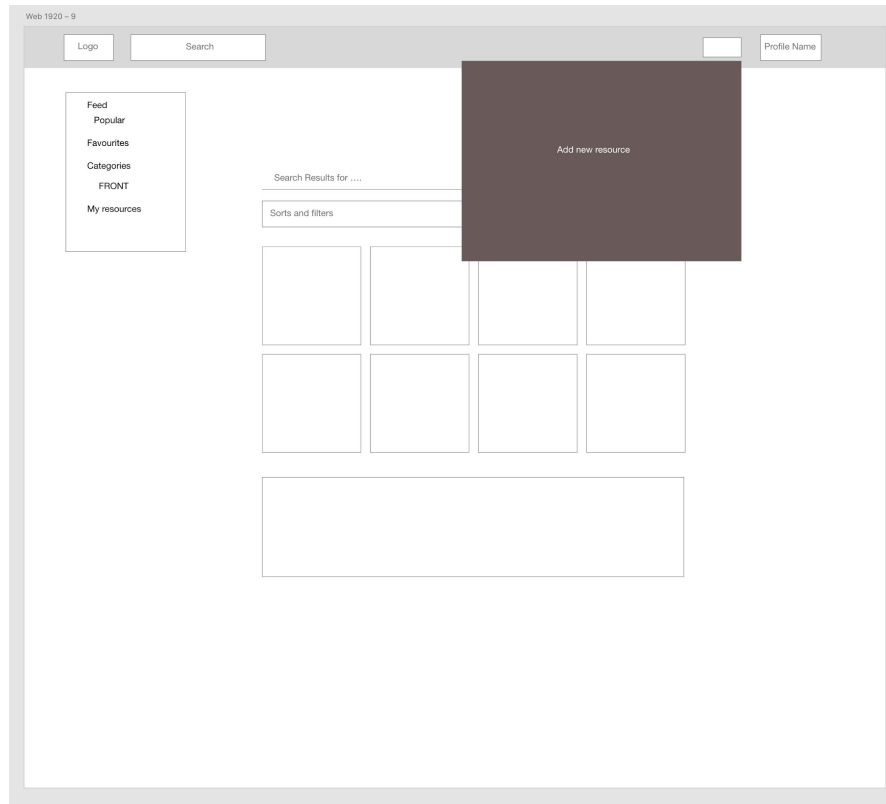

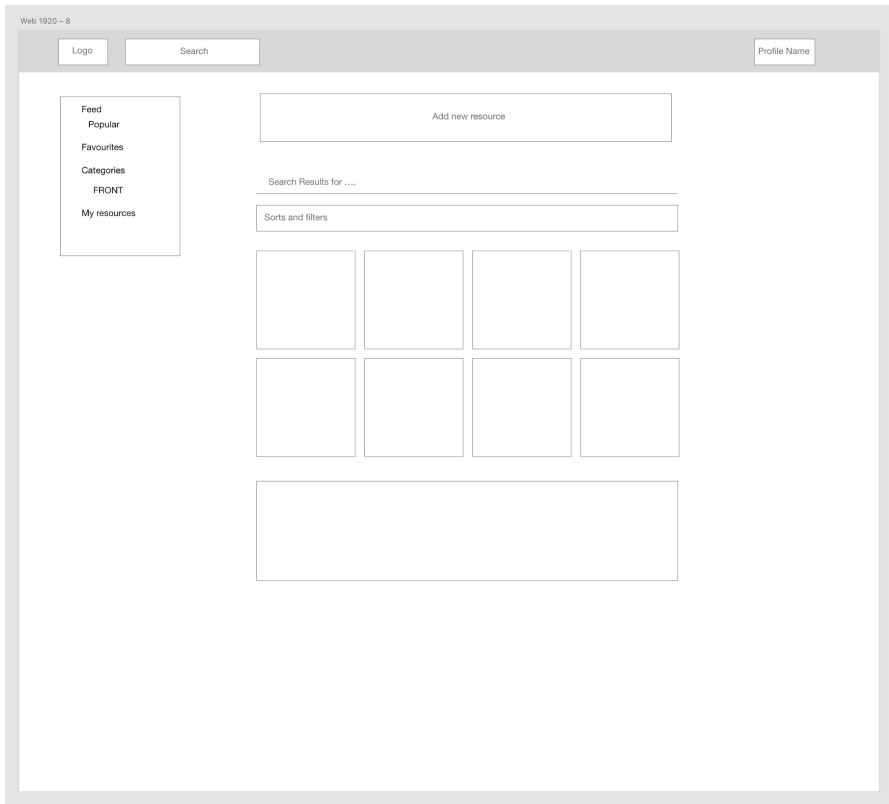

put("/login")

put("/logout")

Endpoints (JSON)

- Get (user_information) (/user/info)
- Put (/user/info)
- Get (resources for user that he created and liked) (/user/resources)
- Get (resources) (/resources)
- Post (resource) (/resources)
- Delete (/resources)
- Patch (/resources)
- Post (/like)
- Delete (/like)
- Post (/rating)
- Patch (/rating)
- Delete (/rating)
- Post (/comment)
- Patch (/comment)
- Delete (/comment)
